

A young man and woman are walking and talking in a university hallway with arches. The man is wearing a backpack and the woman is carrying a folder. They are both smiling and looking at each other. In the background, other students are walking in the same hallway.

GENLYTE SOLUTIONS

a Signify business

Creating a learning environment for bright ideas

Lighting for Higher Education

A comprehensive portfolio

As the global leader in lighting for more than 125 years, Signify has the know-how and the most comprehensive portfolio of energy efficient technology to meet all your application needs.

Educational establishments fulfill a unique role in society as places of learning, belonging, and community cohesion. LED lighting can enhance the learning environment, contribute to comfort and wellbeing, and help sustainability efforts while reducing energy and associated costs compared to traditional lighting. Signify LED lighting creates inviting outdoor areas and indoor spaces that inspire concentration and focus to support your educational objectives for today, tomorrow, and the future.

Save Energy & Reduce Costs

Convert to LED lighting to reduce energy usage and utility spend

Leverage Interact IoT technology to optimize energy usage and maximize savings.

LED lighting can reduce energy usage and utility spend by up to 80%¹, extending the life of your equipment.

Keep maintenance to a minimum with long-lasting LED technology and digital controls that allow you to apply light only as needed.

Support Wellbeing & Security

Contribute to cognitive performance with adaptable lighting

Help support circadian rhythm regulation with spectrally-tuned LED systems and Interact bio-adaptive lighting.²

Inactivate viruses and bacteria in the air and treat surfaces using UV-C technology.

Leverage remote management to monitor the status of your connected lighting system at any time.

Optimize Learning Spaces

Take advantage of control systems to change lighting requirements for a variety of visual tasks supporting different modes of learning

Contribute to productivity, supporting daytime vitality³ and alertness⁴, with lighting systems that allow scene changes at the touch of a button.

By changing color or intensity of the lighting through controls, you can create an ambience to stimulate debate or deliver a calm mood.

Enhance attractiveness to prospective families and business partners by using light to reflect your brand identity or create a particular mood.

Improve Sustainability

Use light only where and when it is needed

Optimize energy consumption and reduce carbon footprint using lighting controls.

Stay on trend while meeting sustainability goals with 3D printed, customizable luminaires.

Make your campus more sustainable through long-life, low-maintenance lighting and reduce your carbon footprint.

1. When compared to traditional incandescent bulbs.
2. Czeisler, 1999; Dijk & Archer, 2009; Lucas 2012, 2019.

3. Partonen 2000.
4. Viola 2008, Smolders 2012; Geerdink 2017.

School applications

Auditorium

Learning Areas:
Enhance focus and contribute to wellbeing with the right lighting.

Social Gathering:
Welcome students into large spaces for socialization or assemblies.

General Illumination:
A bright atmosphere to promote a sense of security and invigorate the community.

Outdoor:
Ensure parking lots, recreational areas, quads, plazas, greenways, as well as walkways feel safe and well-illuminated.

Learning Areas

The health and wellbeing of students and staff is a key priority for educational establishments.

Lighting is an excellent way to modify the spaces in which students learn and the areas in which staff work. Lighting controls allow you to change lighting requirements for a variety of visual tasks, supporting different modes of learning in a single space. By changing the color or intensity of lighting, you can help to create an ambience which stimulates debate or delivers a calm mood. Consider upgrading to LED lighting to promote visual acuity, comfort and performance, while saving energy.

Learning Areas

Linear Wall Mount luminaires for classroom applications

Ledalite SyncLine Wall

Combines performance and slim design with affordability to fit your budget. Options include Interact, AccuRender Tunable White and new BioUp high melanopic tunable technology to enhance your daily life.

Ledalite FloatPlane Wall Mount

Offers a fresh and playful look and performance that rivals that of high-end LED luminaires with the affordability of fluorescent.

Ledalite Jump Wall/Cantilever

Contemporary aesthetic that combines the latest lighting technologies with texture, pattern, and rhythm along an uninterrupted end-to-end continuum of luminance.

Ledalite TruGroove Wall Mount

Drives performance beyond the edge. Innovative optics deliver exceptional uniformity and wide row spacing from a 3" aperture continuous line of light.

Linear Suspended luminaires for classroom applications

Ledalite SyncLine Suspended

Combines performance and slim design with affordability to fit your budget. Options include Interact, AccuRender Tunable White and new BioUp high melanopic tunable technology to enhance your daily life.

Ledalite FloatPlane Suspended

Offers a fresh and playful look and performance that rivals that of high-end LED luminaires with the affordability of fluorescent.

Ledalite Jump Suspended/Surface

Offers aesthetic design elements and playful patterns with multiple distributions in a seamless continuum of luminance.

Ledalite TruGroove Suspended

Drives performance beyond the edge. Innovative optics deliver exceptional uniformity and wide row spacing from a 3" aperture continuous line of light.

Recessed Troffers solutions for classroom applications

Day-Brite FluxGrid Recessed

Offers a familiar style with high quality LED light at an affordable price for your general lighting needs.

Day-Brite FluxGrid Gen 2 Recessed

Offers architectural appeal with "must have" features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite FormFlex Recessed

Delivers high performing, even illumination and visual comfort through a fully luminous aperture.

Learning Areas

Downlighting luminaires for classrooms applications

Lightolier SlimSurface

Sleek, damp location rated, 5/8" thick LED surface-mounted luminaire with the appearance of a recessed downlight.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculte

Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

Recessed Troffers solutions for library applications

Day-Brite FormFlex Recessed

Delivers high performing, even illumination and visual comfort through a fully luminous aperture.

Ledalite SilkSpace Definition

Fully luminous lens, providing excellent visual comfort at a cost-conscious price, ideal for tight budget library projects.

Ledalite ArcForm

Highly efficacious, fully luminous fixture with brilliant color rendering and an innovative 3D symmetrical batwing lighting distribution. It delivers pure white light, free of glare, color shifts, hot spots or striations.

Low bay luminaires for library applications

Day-Brite FluxStream Wraparound

High-performing, energy-efficient luminaire delivering smooth diffused light.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

3D Printed BA L Series

Offers customizable color, texture, finish, and mounting options to build your school's brand while contributing to a sustainable future.

Day-Brite 5F Specification Industrial

Combines traditional aesthetics with high-performing features and specifications, delivering smooth diffused light.

Learning Areas

Downlight luminaires for library applications

Lightolier EasyLyte

Budget-friendly, adaptable and flexible for easy-installation needs.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculite IntelliHue technology

Offers uniform illumination with millions of combinations of precise white and color to reduce glare and support concentration.

Linear strips for library and lecture halls applications

Day-Brite FluxStream Strip

High performing, energy-efficient luminaire delivering smooth diffused light.

Day-Brite NWL Wraparound

Economical, surface mount, general illumination luminaire for commercial use. The slender form and frosted lens create an appealing visual aesthetic.

Ledalite TruGroove Recessed

Drives performance and delivers exceptional uniformity.

Ledalite TruGroove Recessed Micro

Offers a 1-3/4" aperture that delivers exceptional uniformity and wide row spacing. Custom colors and angles are available.

Pendants for library and lecture halls applications

Lightolier 3D Printed Decorative Pendants

Support a circular economy while offering customizable, stylish and flexible options.

Lightolier Calculite Cylinder

Features industry leading visual comfort and uniform illumination to accent display cases.

Learning Areas

Downlighting luminaires for lecture halls applications

Lightolier LyteCaster

Offers ideal, quality and comfortable light while conserving plenum space.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculte with IntelliHue technology

Offers uniform illumination with millions of combinations of precise white and color to reduce glare and support concentration.

Track lighting for library, lecture halls and art gallery applications

Lightolier Track Head

Simple and budget-friendly.

Lightolier BoldFlood

Designed for energy savers looking to maintain high quality performance and rich color saturation from an aesthetic track luminaire.

3D Printed MS Series

Allows you to choose from a variety of finishes and textures, configured to your specifications.

Lightolier OmniSpot

Provides sleek and discrete aesthetics and high power.

Downlighting luminaires for chemical, computer or engineering laboratory applications

Lightolier SlimSurface

A slim, surface-mounted option that is great for utility closets.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculte

Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

Learning Areas

Cleanroom luminaires

for chemical and engineering laboratory applications

Day-Brite Kleenseal 100 Recessed Cleanroom

Practical luminaire, well-suited for chemical or engineering laboratories.

Day-Brite FluxPanel

Versatile cleanroom luminaire designed to provide smooth lighting gradient on the lens surface and ease of installation. Available for use in recessed, suspended, and surface mount orientation.

Day-Brite FluxStream Sealed Strip

Linear option, suitable for wet locations and available in a variety of lengths and color temperatures.

Day-Brite V3W Vaporlume

Specialized wet location, IP rated product designed for use in both indoor and outdoor environments. It is a wet location listed, noncorrosive luminaire, ideal for cold storage environments.

Linear industrial luminaires for engineering laboratory applications

Day-Brite FluxStream Sealed Strip

Linear option, suitable for wet locations and available in a variety of lengths and color temperatures.

Day-Brite LBX Linear Suspended

Provides versatility, delivering up to 150 LPW, offers multiple light distributions, and the capability of simple row mounting. Optional LightBalance optics put the light where it's needed.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Day-Brite DW Vaporlume Industrial

Sealed and durable for use in wet locations.

Linear strips for computer laboratory applications

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Ledalite BoldPlay Suspended

Provides broad, indirect distribution for uniform, glare-free lighting, ideal for screen time in computer labs.

Ledalite TruGroove Suspended Micro

Offers a 1-3/4" aperture that delivers exceptional uniformity and wide row spacing. Custom colors and angles are available.

Ledalite TruGroove Recessed

Drives performance and delivers exceptional uniformity.

Retrofit Solutions

Recessed troffers

for library, classrooms, and administration office applications

Philips EvoKit retrofit kit

Easily upgrade existing fluorescent troffers to fast-track payback with energy-efficient LEDs in just 5 minutes.

Downlighting

for library, offices, lecture halls, classrooms and laboratory applications

Lightolier Commercial Retrofit Downlight

An easy and quick downlight solution that is perfect for varying ceiling heights.

LED Spots for downlights, pendants, track, and low bays

Philips CorePro LED PAR and MR lamps

Offer efficiency and quality to meet your basic lighting needs.

Philips MasterClass LED ExpertColor PAR lamps

Provide warm, rich light to create an inviting atmosphere.

Philips CorePro LED A-Shape lamps

Deliver energy savings, minimized maintenance cost and dependable performance, compared to traditional incandescent bulbs, to meet your basic lighting needs.

Philips MasterClass LED A-Shape lamps

Feature smooth dimming down to 10% or less in a variety of color temperatures to create an inviting atmosphere any time of day.

TLEDs for troffers and linear fixtures

Philips CorePro LED InstantFit Linear lamps

Integrate into traditional fluorescent form factors to upgrade your general lighting and conserve energy.

Philips MasterClass LED InstantFit Linear lamps

Provide consistent light output for quality illumination and are available in plastic for shatter resistance.

Social Gathering

Welcome the campus community into large, indoor spaces to share in special moments with peace of mind. Consider UV-C solutions in lecture halls to add a layer of protection in busy spaces. LED lighting can be used to change the mood for different events, add color to a space or to simply save energy.

Social Gathering

Downlighting for dining hall, arena, student center and auditorium applications

Lightolier EasyLyte

Budget-friendly, adaptable and flexible for easy-installation needs.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculite

Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

Lightolier Calculite with IntelliHue technology

Offers uniform illumination with millions of combinations of precise white and color to reduce glare and support concentration.

Pendants for dining hall, arena, student center and auditorium applications

3D Printed Decorative Pendants

Support a circular economy while offering customizable, stylish and flexible options.

Lightolier Calculite Cylinder

Features industry leading visual comfort and uniform illumination to accent display cases.

Low bay for dining hall, arena, student center, auditorium and gymnasium applications

Day-Brite FluxStream Strip

High performing, energy-efficient luminaire delivering smooth diffused light ideal for hallways.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

3D Printed BA-L Series

Offers customizable color, texture, finish, and mounting options to build your school's brand while contributing to a sustainable future.

Day-Brite FluxGrid Gen 2 Recessed

Offers architectural appeal with "must have" features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Social Gathering

Architectural solutions

Ledalite

Explore the entire offering of award-winning, inspiring, and innovative indoor lighting solutions that allow specifiers to create a unique vision.

Color Kinetics

Delivers indoor and outdoor LED lighting systems in a wide range of types, form factors, and output levels — empowering you to achieve your unique vision.

Recessed troffers for dining hall applications

Day-Brite FluxGrid Recessed

Offers a familiar style with high quality LED light at an affordable price for your general lighting needs.

Day-Brite FluxGrid Gen 2 Recessed

Offers architectural appeal with "must have" features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite FormFlex Recessed

Delivers high performing, even illumination and visual comfort through a fully luminous aperture.

Gardco SoftView

Features edge-lit technology for visual comfort with minimal glare, making it great for a dining area. Provide a sense of security after dark with an added uplight feature.

Linear Suspended for dining hall applications

Ledalite SyncLine Suspended

Combines performance and slim design with affordability to fit your budget. Options include Interact, AccuRender Tunable White and new BioUp high melanopic tunable technology to enhance your daily life.

Ledalite FloatPlane Suspended

Provides the affordability of fluorescent with the quality of high-end LED luminaires

Ledalite Jump Suspended

Offers aesthetic design elements and playful patterns with multiple distributions in a seamless continuum of luminance.

Ledalite TruGroove Suspended

Drives performance and delivers exceptional uniformity.

Social Gathering

Step Light solutions for auditorium applications

Chloride SoftGlo Night Light

Provides low-level illumination for small areas in a variety of color temperatures and finishes.

Chloride PathMaster Mini Step Light

An architectural, customizable, and energy-efficient option.

Chloride SD Series Step Light

A small, weather-proof option available in a variety of color temperatures and finishes with different faceplate options.

Chloride MSL Series Mini Step Light

A mini low-level lighting option offered in a variety of finishes, ideal for an auditorium.

Tape Light for auditorium applications

Vaya Free Form

Sets the mood of interior and exterior spaces with this compact, bendable LED luminaire.

Day-Brite HCY LED High Bay

Presents functional lighting with an aesthetic appeal and round form factor perfect for a gymnasium, auditorium, or other area of a school with high ceilings.

3D Printed PM Series

Consists of customizable, durable and high output polycarbonate pendants. Try adding lighting with your school colors to the gym!

Day-Brite RBX LED High Bay

Fulfills your general lighting needs with a variety of lumen packages and color temperatures.

High Bay (Rectangular) for gymnasium and arena applications

Day-Brite FCY LED High Bay

Merges performance with quality for a cost-efficient, high-ceiling solution.

Day-Brite FBY LED High Bay

Versatile in form and function with a variety of lumen packages and accessories for your needs.

Day-Brite FBZ LED High Bay

Combines targeted optics with energy efficiency to provide the right light in your space.

Day-Brite HBY High Bay

Provides durability in an appealing compact form and is suitable for use in wet locations such as your natatorium.

Social Gathering

Track for gymnasium and arena display area applications

Lightolier BoldFlood

Designed for energy savers looking to maintain high quality performance and rich color saturation from an aesthetic track luminaire.

3D Printed MS Series

Allows you to choose from a variety of finishes and textures, configured to your specifications.

Lightolier OmniSpot

Provides sleek and discrete aesthetics and high power.

Linear for gymnasium and student center applications

Day-Brite FluxStream EZ LED Wraparound

Simple, 4', energy-efficient option ideal for brightening your hallways and stairwells.

Day-Brite FluxStream LED Wraparound

High-performing, energy-efficient luminaire delivering smooth diffused light.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Day-Brite 5F LED Specification Industrial

Combines traditional aesthetics with high-performing features and specifications, delivering smooth diffused light.

Recessed Troffers for gymnasium and student center applications

Day-Brite FluxGrid Recessed

Offers a familiar style with high quality LED light at an affordable price for your general lighting needs.

Day-Brite FluxGrid Gen 2 Recessed

Offers architectural appeal with "must have" features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite FormFlex Recessed

Delivers high performing, even illumination and visual comfort through a fully luminous aperture.

Social Gathering

Recessed Troffers for locker room applications

Day-Brite FluxPanel Selectable

A versatile luminaire available in a variety of sizes with selectable color temperatures and lumen packages and recessed or surface mounting options.

Day-Brite T-Grid Recessed

Low profile with excellent general illumination performance for dark areas such as locker rooms.

Day-Brite FluxGrid Gen 2 Recessed

Offers architectural appeal with "must have" features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Downlighting for gymnasium and locker room applications

Lightolier SlimSurface

Sleek, damp location rated, 5/8" thick LED surface-mounted luminaire with the appearance of a recessed downlight.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculite IntelliHue technology

Offers uniform illumination with millions of combinations of precise white and color to reduce glare and support concentration.

Lightolier LyteProfile Shower Light

Provides an adaptable, flexible design for use in wet locations, making it perfect to brighten the dark corners of your locker room.

Recessed Troffers for dormitories

Day-Brite FluxGrid Recessed

Offers a familiar style with high quality LED light at an affordable price for your general lighting needs.

Day-Brite FluxGrid Gen 2 Recessed

Offers architectural appeal with "must have" features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite FormFlex Recessed

Delivers high performing, even illumination and visual comfort through a fully luminous aperture.

Social Gathering

Linear for dormitory applications

Day-Brite FluxStream Wraparound

High-performing, energy-efficient luminaire delivering smooth diffused light ideal for hallways.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Day-Brite DormLyte LED

Only 3-7/8" deep, it meets American With Disabilities Act for wall mounted fixtures. Multiple lumen/watt packages for design flexibility and added energy savings. Ideal for over bed or wall mount applications.

Day-Brite LPL Vandal Resistant

Heavy-duty and designed to meet demands of extreme environments, ideal for a dormitories.

Downlights for dormitory applications

Lightolier SlimSurface

Sleek, damp location rated, 5/8" thick LED surface-mounted luminaire with the appearance of a recessed downlight.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculite

Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

Lightolier LyteProfile Shower Light

Provides an adaptable, flexible design for use in wet locations, making it perfect to the brighten dark corners of your dormitories.

Lighting inspired by nature for meeting space applications Trulifi for meeting space applications

Ledalite NatureConnect

Lighting inspired by nature. Bringing the colors and dynamics from nature indoors for a fully immersive experience.

Trulifi by Signify

Get secure, high-speed Internet through your lights with LiFi.

Retrofit solutions

Recessed Troffers

for dining hall, gymnasium, locker room, dormitories and student center applications

Philips EvoKit retrofit kit

Easily upgrade existing fluorescent troffers to fast-track payback with energy-efficient LEDs in just 5 minutes.

Downlighting

for dining hall, gymnasium, locker room, arena, dormitories, student center, and auditorium applications

Lightolier Commercial Retrofit Downlight

An easy and quick downlight solution that is perfect for varying ceiling heights.

LED Spots

Philips CorePro LED PAR and MR lamps

Offer efficiency and quality to meet your basic lighting needs.

Philips MasterClass LED ExpertColor PAR lamps

Provide warm, rich light to create an inviting atmosphere.

Philips CorePro LED A-Shape lamps

Deliver energy savings, minimized maintenance cost and dependable performance, compared to traditional incandescent bulbs, to meet your basic lighting needs.

Philips MasterClass LED A-Shape lamps

Feature smooth dimming down to 10% or less in a variety of color temperatures to create an inviting atmosphere any time of day.

TLEDs for troffers, linear fixtures, and rectangular high bays

Philips CorePro LED InstantFit Linear lamps

Integrate into traditional fluorescent form factors to upgrade your general lighting and conserve energy.

Philips MasterClass LED InstantFit Linear lamps

Provide consistent light output for quality illumination and are available in plastic for shatter resistance.

High Bay Lamps

Philips CorePro LED High Bay lamps

Help reduce energy usage in your existing HID high bay application.

Philips MasterClass LED TrueForce High Bay lamps

Couple light distribution and high color rendering with energy efficiency to create a comfortable and high productivity environment.

General Illumination

LED lighting can be used to invigorate students and staff throughout campus.

Provide welcoming environments with adjustable, energy-efficient LED lighting to promote wellbeing while limiting energy consumption. Choose from a variety of LED lamps and luminaires to enhance the atmosphere within your buildings, using light to reflect your brand identity or create a particular mood.

Now more than ever, the health and security of everyone on campus is a top priority. Consider UV-C solutions to treat the air and surfaces of busy spaces and inactivate bacteria and viruses. Provide a sense of security in dark areas, such as stairwells or outdoor walkways, and use control solutions to conserve energy and prioritize sustainability, using light only where and when it is needed.

General Illumination

Recessed Troffers for hallway, stairwell, restroom, and administration office applications

Day-Brite FluxGrid Gen 2 Recessed

Offers architectural appeal with “must have” features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite EvoGrid Recessed

Balances affordability and dependable design with architectural appeal.

Day-Brite FormFlex Recessed

Delivers high performing, even illumination and visual comfort through a fully luminous aperture.

Linear for hallway applications

Day-Brite FluxStream Strip

High performing, energy-efficient luminaire delivering smooth diffused light.

Day-Brite NWL LED Wraparound

Economical, surface mount, general illumination luminaire for commercial use. The slender form and frosted lens create an appealing visual aesthetic.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Ledalite SyncLine Suspended

Combines performance and slim design with affordability to fit your budget. Options include Interact, AccuRender Tunable White and new BioUp high melanopic tunable technology to enhance your daily life.

Downlighting for hallway applications

Lightolier SlimSurface

Sleek, damp location rated, 5/8" thick LED surface-mounted luminaire with the appearance of a recessed downlight.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculite

Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

General Illumination

Linear for stairwell applications

Day-Brite FluxStream EZ Wraparound

Simple, 4', energy-saving option ideal for brightening your stairwells.

Day-Brite Stairwell

Offers bi-level lighting and an integrated motion sensor to balance energy savings with a feeling of security.

Day-Brite FluxStream Wraparound

High-performing, energy-efficient luminaire delivering smooth diffused light ideal for hallways.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Linear for restroom applications

Day-Brite FluxStream Strip

High performing, energy-efficient luminaire delivering smooth diffused light ideal for restrooms.

Day-Brite FluxStream Wraparound

High-performing, energy-efficient luminaire delivering smooth diffused light.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Day-Brite LPL Vandal Resistant

Heavy-duty and designed to meet demands of extreme environments, ideal for a school restroom.

Downlighting for restroom applications

Lightolier EasyLyte

Budget-friendly, adaptable and flexible for easy-installation needs.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculite

Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

General Illumination

Linear for utility closet applications

Day-Brite FluxStream Strip

High performing, energy-efficient luminaire delivering smooth diffused light ideal for utility closets.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

Day-Brite DW Vaporlume Industrial

Sealed and durable for use in wet locations.

Day-Brite V3W Vaporlume

Specialized wet location, IP rated product designed for use in both indoor and outdoor environments. It is a wet location listed, noncorrosive luminaire, ideal for cold storage environments.

Recessed Troffers for utility closet applications

Day-Brite T-Grid Recessed

Low profile with excellent general illumination performance for dark areas.

Day-Brite FluxGrid Gen 2 Recessed

Offers architectural appeal with "must have" features, including two different lens styles, discrete air return, integral emergency, and access to the boards and driver from below.

Day-Brite EvoGrid Recessed

Balances affordability and dependable design with architectural appeal.

Downlighting for utility closet applications

Lightolier Flat Downlight

An easy and quick downlight solution that is perfect for shallow ceilings.

Lightolier SlimSurface

Sleek, damp location rated, 5/8" thick LED surface-mounted luminaire with the appearance of a recessed downlight.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

General Illumination

Low Bay

for building lobby or atrium applications

Day-Brite FluxStream Strip

High performing, energy-efficient luminaire delivering smooth diffused light.

3D Printed BA L Series

Offers customizable color, texture, finish, and mounting options to build your school's brand while contributing to a sustainable future.

Pendants

for administration offices, building lobby or atrium applications

3D Printed Decorative Pendants

Support a circular economy while offering customizable, stylish and flexible options.

Lightolier Calculite Cylinder

Features industry leading visual comfort and uniform illumination to accent display cases.

Linear for administration office applications

Day-Brite FluxStream Strip

High performing, energy-efficient luminaire delivering smooth diffused light.

Day-Brite OWL Wraparound

The ideal surface mount general illumination luminaire for quality and affordability.

Day-Brite 5F LED Specification Industrial

Combines traditional aesthetics with high-performing features and specifications, delivering smooth diffused light.

Ledalite FloatPlane Suspended

Provides the affordability of fluorescent with the quality of high-end LED luminaires.

Low Bay for administration office applications

Day-Brite FluxStream Strip

High performing, energy-efficient luminaire delivering smooth diffused light.

Day-Brite FluxSpace

Featuring a small form factor with a wide range of lumen packages and optical distributions, FluxSpace offers an abundance of value and performance for a variety of applications.

3D Printed BA L Series

Offers customizable color, texture, finish, and mounting options to build your school's brand while contributing to a sustainable future.

Downlighting for administration office applications

Lightolier EasyLyte

Budget-friendly, adaptable and flexible for easy-installation needs.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculite IntelliHue technology

Offers uniform illumination with millions of combinations of precise white and color to reduce glare and support concentration.

Downlighting for healthcare clinic applications

Lightolier SlimSurface

Sleek, damp location rated, 5/8" thick LED surface-mounted luminaire with the appearance of a recessed downlight.

Lightolier LyteProfile

Flexible and design-friendly, offering both square and round options, without compromising quality.

Lightolier Calculite

Offers quality uniform illumination, patented installation flexibility, and industry leading visual comfort to support concentration.

Wall Mount Healthcare Bed Lights for healthcare clinic applications

Day-Brite Horizon Bed Light

Provides an aesthetically pleasing and functional design for any bed light application.

Day-Brite CareWell Eco

Value-oriented solution offering dual lamp compartments, delivering ambient and reading illumination while eliminating debilitating direct glare.

Day-Brite Tableau Wall

Flexible solution with a rotatable aperture that allows field aiming to direct the light where it's needed.

Patient Room Recessed

for healthcare clinic applications

Day-Brite Multi-Med

Facilitates comfort, care and control, providing the essential illumination for exam rooms.

Retrofit solutions

Recessed Troffers

for hallways, stairwells, restrooms, and utility closet applications

Philips EvoKit retrofit kit

Easily upgrade existing fluorescent troffers to fast-track payback with energy-efficient LEDs in just 5 minutes.

Downlighting

for hallways, stairwells, restrooms, utility closets and healthcare clinic applications

Lightolier Commercial Retrofit Downlight

An easy and quick downlight solution that is perfect for varying ceiling heights.

LED Spots

Philips CorePro LED PAR and MR lamps

Offer efficiency and quality to meet your basic lighting needs.

Philips MasterClass LED ExpertColor PAR lamps

Provide warm, rich light to create an inviting atmosphere.

Philips CorePro LED A-Shape lamps

Deliver energy savings, minimized maintenance cost and dependable performance, compared to traditional incandescent bulbs, to meet your basic lighting needs.

Philips MasterClass LED A-Shape lamps

Feature smooth dimming down to 10% or less in a variety of color temperatures to create an inviting atmosphere any time of day.

TLEDs

Philips CorePro LED InstantFit Linear lamps

Integrate into traditional fluorescent form factors to upgrade your general lighting and conserve energy.

Philips MasterClass LED InstantFit Linear lamps

Provide consistent light output for quality illumination and are available in plastic for shatter resistance.

Security & Emergency

**Promote a sense of security and comfort
by ensuring well-lit spaces throughout the
interior and exterior of the building.**

Now more than ever, the health and safety of students and staff is top priority. Consider upper air UV-C solutions to inactivate viruses and bacteria in busy areas, such as gymnasiums and dining halls.

Meet code requirements with exit and emergency solutions that provide a sense of security for your students and staff in hectic moments.

Security & Emergency

Exit/Emergency

**Chloride Value+
VLTC Exit Combo**

Suitable for any general-purpose application with its low-profile design and affordability.

**Chloride Compac
CLC Exit Combo**

Prepares you for any emergency with its sleek design that enables general wayfinding and immediate egress in an emergency.

**Chloride Edge-Lit
44R Exit Sign**

Features a contemporary universal and compact design that can be surface-mounted or recessed.

**Chloride Compac
LED Emergency Unit**

Allows for immediate and safe egress in low light situations and works in harmony within commercial and light industrial applications.

UV-C solutions for upper air and surface treatment applications

UV-C lighting can play an important role in neutralizing harmful viruses and bacteria, especially in mask-off environments such as cafeterias. This additional layer of protection may provide a greater sense of comfort for teachers and coaches, as they lead students while in classrooms and gymnasiums. UV-C upper-air and closed chambers can also run continually, helping to reduce the need for manual disinfection, especially in high-traffic areas such as restrooms or locker rooms.

**Alkco UV-C Upper Air
U2C 2x2 Grid Ceiling Mount**

Treats air in occupied spaces to offer a layer of protection against bacteria, viruses, and fungal spores to help your students and staff feel secure.*

**Alkco UV-C Upper Air
UWL Louvered Wall Mount**

Treats air in occupied spaces to offer a layer of protection against bacteria, viruses, and fungal spores to help your students and staff feel secure.*

**Alkco UV-C Surface
UST Strip**

Can immobilize bacteria on preparation surfaces and equipment with surface and suspended mounting options.

**Alkco UV-C Surface
UHB High Bay**

Can immobilize bacteria on preparation surfaces and equipment for ceiling heights of 10' to 25'.

Control Systems for UV-C applications

Philips Dynalite UV-C Controls

Control system allows the UV-C lighting system to be used and operated with greater safety than a system without an equivalent control solution in place.

Interact

The Interact Space Management application can be used to further identify which areas have been occupied and need to be sanitized, as well as help manage social distancing.

Once BioShift Chambers

Uses UV-C light to inactivate viruses and other pathogens on objects placed in the chamber, neutralizing most viruses in 5 minutes.

*Signify wall mount and ceiling mount upper air UV-C luminaires were tested for SARS-CoV-2 in Innovative Bioanalysis Lab. The wall-mounted luminaire achieved 99.9% reduction in 10 minutes and the ceiling mount luminaire achieved 92.6% reduction in 20 minutes. The luminaires were also tested for Escherichia coli in Intertek Lab. Both luminaires achieved 99.9% reduction in 45 minutes.

Campus Main Roads

A university or college's main roads are heavily traveled by students at all times whether it's to classes, social gatherings, or meals.

In addition, main roads are also key areas for building the look, feel, and brand identity of schools. Highly customizable LED luminaires with craftsmanship are the perfect solution on main roads to help build brand identity while providing a properly lit environment for traveling. Adding controls technology to the luminaires allow for energy savings especially for schools with bigger campuses.

Outdoor: Campus Main Roads

Outdoor Lighting for Campus Main Road applications

All luminaires for Campus Main Roads (except for the Contemporary Lantern Post Top) have lighting control options to reduce energy cost and environmental impact.

Hadco Architectural VX600 Post Top

A masterful blend of traditional looks and modern technology, this luminaire preserves a school's history while providing optimal photometric performance for visibility. Its light engine is IP66 rated protecting it from the elements and offering years of maintenance-free operation.

Hadco Refractive Globe Post Top with LumiLock

Timeless charm with configurable options to add school colors, names, logos, and mascots to showcase school brand and history. The LumiLock light engine easily replaces HID sources.

Hadco Hagerstown Comfort Post Top

Flexible designs for additional aesthetics to enhance a school's brand and feel. Comfort optics reduces glare to enhance visual comfort for pedestrians and drivers on campus.

Gardco PureForm Post Top Comfort

A sleek and low-profile luminaire that preserves the aesthetics of campuses while providing a cohesive look with PureForm Family luminaires for other applications. Comfort optics reduces glare to enhance visual comfort for pedestrians and drivers on campus while precision optics are optimized for performance, uniformity, and spacing.

Gardco Form 10 Post Top

Adds a retro feel to campuses while allowing a multitude of color finishes that matches a school's brand colors. Comfort optics reduces glare to enhance visual comfort for pedestrians and drivers on campus. Provides a consistent experience between indoor and outdoor lighting control.

Outdoor: Campus Main Roads

Outdoor Lighting for Campus Main Road applications

All luminaires for Campus Main Roads (except for the Contemporary Lantern Post Top) have lighting control options to reduce energy cost and environmental impact.

Lumec Omniscape Post Top & Arm Mount

Enables schools to build a highly personalized look on a spectrum from contemporary, transitional, to historical. ComfortEdge and LEDgine light engines allow schools to choose higher lumen outputs for certain applications or reduced glare to improve visual comfort.

Lumec Contemporary Lantern Post Top

A unique blend of modern architecture and old-world charm ideal for schools that want a timeless look. Top-quality materials allow for excellent performance in even the most demanding environments. Easy maintenance due to the tool free access to lamp and electrical components.

Lumec Urbanscape Post Top

Architectural lighting with a modern twist gives an additional option for schools not going for the historic look. Comfort optics reduces glare to enhance visual comfort for pedestrians and drivers on campus while precision optics are optimized for performance, uniformity, and spacing.

Lumec Metroscopic Post Top

An additional architectural lighting option for schools opting for a heritage look. Comfort optics reduces glare to enhance visual comfort for pedestrians and drivers on campus while precision optics are optimized for performance, uniformity, and spacing.

Lumec RoadFocus Plus Cobra Head Roadway

Minimalistic design blends in seamlessly with the environment and is a good choice for schools opting for a simple look on campus. Industry leading efficacy helps universities and campuses save on energy cost while providing the necessary illumination.

Lumec Roadstar Architectural Roadway

Artistic roadway design mixed with high performance gives schools a striking and unique look while providing necessary illumination on campus.

Parking (Lots & Garages)

With so many commuters on campus along with the school's own bus fleets, it is imperative that parking lots and garages are comfortable and secure for users.

This means that schools have to accommodate for open and enclosed parking spaces and also for vehicles of different sizes. Having options for garage or area lights and lights with different outputs and heights ensure that there are solutions for parking spaces and vehicles of many sizes and shapes. Enhanced technologies such as comfort optics, motion sensing, and controls allow for additional comfort while reducing energy cost.

Outdoor: Parking

Parking Garage Lighting for Parking applications

Day-Brite FluxStream Sealed Strip

Linear option, suitable for wet locations and available in a variety of lengths and color temperatures.

Stonco Keene Garage and Canopy Round Dual-Select

The go-to durable, cost-effective lighting solution, for your parking garages, covered walkways and outdoor canopies in a round form factor.

Stonco Keene LytePro Garage and Canopy

A perfect blend of affordability, quality, and performance designed for budget conscious garage projects. It is easy to install and comes with the SpiroGuide light engine for high performing, comfortable, and low glare lighting.

Gardco SoftView Parking Garage

Ultimate customizability with multiple lumen packages, CRI, distributions, and mountings. Comfort optics reduces glare for a more comfortable driving experience while the uplight feature eliminates the cave effect for a sense of security. Motion sensors help reduce energy costs and environmental impact.

Parking Lot Lighting for Parking applications

Parking Lot luminaires all come with control options to reduce cost and environmental impact.

Gardco OptiForm Area

Wide range of lumen outputs and distributions with best in class efficacy allow flexible applications while achieving higher energy savings. Lightweight design makes installation easier while Service Tag technology simplifies maintenance.

Gardco LED DuraForm Floods

A unique combination of versatility, durability, and performance, this luminaire stands the test of time. Reliably withstanding harsh weather and wear, DuraForm floodlights precisely illuminate dark lots with minimal light spill to ensure staff and student security after hours.

Gardco PureForm Area P26

A sleek and low-profile luminaire that preserves the aesthetics of campuses while providing a cohesive look with PureForm Family luminaires for other applications. Higher mounting height with precision optics are well suited for covering larger open areas such as parking lots.

Lumec RoadFocus Plus Cobra Head Roadway

Minimalistic design blends in seamlessly with the environment and is a good choice for schools opting for a simple look on campus. Industry leading efficacy helps universities and campuses save on energy cost while providing the necessary illumination.

Lumec Roadstar Architectural Roadway

Artistic roadway design mixed with high performance gives schools a striking and unique look while providing necessary illumination on campus.

Building Exteriors

While students spend a lot of time indoors on school campuses, having a secure and pleasant building exterior is just as important.

Students need to be able to get to classes, dorms, and events safely while also feeling safe when meeting up with friends outside of buildings. Area lights, wall lights, and bollards with a family approach serves this purpose well by providing a cohesive look for luminaires of different types and applications. Enhanced technologies such as comfort optics, motion sensing, and controls allow for additional comfort while reducing energy cost.

Outdoor: Building Exteriors

Gardco PureForm for Building Exterior applications

Gardco PureForm is a family of sleek and low-profile luminaires that preserve the aesthetics of campuses while providing a cohesive look with PureForm luminaires for multiple applications. PureForm luminaires all come with a wide range of control options from simple to advance to reduce energy cost and environmental impact.

Gardco PureForm Area P15

Area lighting in a square shape provides an additional aesthetic option. Comfort optics reduces glare to enhance visual comfort making it ideal for pedestrian scale applications.

Gardco PureForm Area P20

Area lighting in a round shape provides an additional aesthetic option. Comfort optics reduces glare to enhance visual comfort making it ideal for pedestrian scale applications.

Gardco PureForm PWS Comfort Wall Sconce

Comfort optics option provide enhanced user experience for those entering buildings or waiting outside while precision optics option provide higher outputs for buildings covering larger areas.

Gardco PureForm Bollard

Pedestrian scale lighting and high-performance optical system are well suited for lighting pathways such as those leading to dormitories and for highlighting landscapes.

Area Lighting for Building Exterior applications

Stonco Keene LytePro Area

A perfect blend of affordability, quality, and performance designed for budget conscious site and area projects. Lightweight design makes installation easier while Service Tag technology simplifies maintenance. Photocell and motion sensing control options to reduce energy costs and environmental impact.

Gardco OptiForm Area

Wide range of lumen outputs and distributions with best in class efficacy allow flexible applications while achieving higher energy savings. Lightweight design makes installation easier while Service Tag technology simplifies maintenance. Multiple control options to reduce energy cost and environmental impact.

Philips CorePro Corn Cob Lamps

Maximize energy savings with this LED retrofit solution at an affordable price.

Philips MasterClass TrueForce Corn Cob Lamps

Provide the "perfect fit" with uncompromising efficacy and color quality to keep parking areas brightly lit.

Outdoor: Building Exteriors

Wall Mounts for Building Exterior applications

Gardco GeoForm Wall Sconce

Modern and compact with multiple shape options, this wall light blends into the aesthetics of any school. Precision Plus optics increase energy savings and enhance visual comfort while Light Effects optics highlight important building features. Microwave sensor increases energy savings without compromising aesthetics while Dynadimmer allows multiple dimming schedules.

Gardco 121 Wall Sconce

Sleek and stylish with a blend of contemporary and timeless design, this luminaire blends into a wide range of aesthetics. Multiple lumen packages and distribution optics enable flexibility when spacing luminaires meaning that schools can choose between aesthetics and functionality. A wide range of controls options to reduce energy costs and environmental impact.

Philips CorePro Wall Pack Lamps

An ideal HID replacement providing high intensity illumination for added visibility outside of your building.

Bollard Lighting for Building Exterior applications

Gardco Louver Bollard (BRM83)

Simple and seamless design combined with weather sealing makes this bollard a good fit for many environments. The system uses stacked modular louvers to control glare and provide uniformity for improved visual comfort. Motion sensing technology reduces light levels when not needed allowing for up to 90% energy savings.

Gardco Full Cutoff Bollard (BR840)

Stylish and rugged, this luminaire blends into contemporary and traditional architecture while withstanding punishing environments. Exceptional light levels with full cutoff performance provide safety and comfort while meeting stringent LEED requirements and dark sky ordinances. "Head only" configuration for mounting onto concrete or architectural elements.

Outdoor: Solar Solutions

Solar Lighting for various applications

A clean source of energy along with programmable dimming profiles and motion sensors reduce environmental impact while helping schools save money especially in areas where electricity is expensive or unreliable.

Lumec RoadFocus Plus Solar

Offers benefits of the RoadFocus Plus with an off grid solar-powered twist meaning no need for access to an electric grid. This solar-powered off-grid lighting solution does not require any trenching or cabling allowing schools to preserve their landscapes.

Gardco OptiForm Solar

Offers benefits of the OptiForm LED Area with an off grid solar-powered twist meaning no need for access to an electric grid. This solar-powered off-grid lighting solution does not require any trenching or cabling allowing schools to preserve their landscapes.

Gardco SolarForm G3

Provides high-quality illumination and reliable performance. An off-grid option where no need for access to the grid and no need for trenching or cabling, allowing schools to preserve their landscape. A Hybrid option primarily operates on solar power but can switch to grid when needed for uninterrupted illumination throughout the night.

Architectural Lighting

Universities and colleges have a focus on building their own unique brands as well as a sense of community for students. An easy way to achieve both of these goals is to use color-changing LED architectural lighting systems. These lighting systems enable schools to light up facades and monuments to showcase their brand colors or to highlight important features of the school.

In addition, architectural lighting allows for a colorful display of lights for events and celebrations to bring students together. Color Kinetics' architectural lighting delivers indoor and outdoor LED lighting systems in a wide range of types, form factors, and output levels – empowering you to achieve your unique vision.

Your smart school building blocks

Interact City utilizes powerful software applications to reduce energy cost, help keep schools secure, and transform urban and roadway luminaires into points for data collection. Add sensors to roadway luminaires to gain additional insights to your campus and help better manage them.

Lighting asset management

Lighting asset management software gives you full visibility into your lighting infrastructure. Automatic fault detection alerts you to issues for quick response and minimal downtime. Data can be used to make informed decisions and optimize lighting performance. Manage lighting-related workflows from an intuitive application and view data from a centralized dashboard.

Energy optimization

Optimize street lighting performance and accurately measure energy usage in real-time. Full control of your city lighting lets you reduce CO₂ emissions, make progress toward your sustainability goals, and lower energy usage and costs. Those savings can be reinvested into other areas of your city's infrastructure.

Scene management

Remotely adapt city lighting to suit time of night, season, or event. Turn lighting up if there's a traffic incident or a crime. Dim to 30% when the streets are empty late at night. Use sensors on the light poles to detect activity, keeping your citizens safe and comfortable – easily turning parks and plazas into livable spaces.

Sensors

Turn every street light luminaire into a city sentinel. Outdoor sensors which detect motion/presence, tilt, vibration, ambient temperature, noise and others, can be attached to a luminaire fitted with the ZHAGA Book 18 push-and-twist lock socket interface. The sensing functions can be remotely configured and data can also be sent directly to the Interact City application.

The benefits of lighting controls

Because it helps you become the school you want to be.

Lighting controls save energy, are often required by code, and allow adjustable lighting to enhance a learning environment. Take advantage of Signify's expansive controls portfolio to reap the benefits.

Be a high-performing school students and teachers want

Use adjustable lighting to improve classroom comfort and help stimulate and engage pupils.

Be an energy and cost efficient school

Use sensors to detect activity and daylight levels and automate your lighting to match school schedules, timetables or between classes foot traffic.

Be a school that's continually improving.

Via a convenient dashboard you or your installer can access a wealth of information to further optimize your school's lighting and make savings.

Enhance your security

Use sensors to detect movement, instantly activating lights after hours. Interact Pro complies with DLC cybersecurity requirements to ensure the safety of your system.

Smart lighting can boost efficiency in three ways.

1

Energy efficiency

By switching to LED you'll achieve the same light output using far less energy.

2

Longer lifespan

Save on replacements with long-lasting LED technology reducing cost, hassle and disruption.

Last up to **25x** longer

3

Automation

Add lighting controls to save year on year by aligning your lighting usage with your work day.

- A. Occupancy-based dimming
- B. Daylight sensing and dimming
- C. Occupant personalization
- D. Task-based tuning (dimmers/switches)
- E. Combined strategies

- ✓ Use sensors to detect light levels and adjust lighting outputs to provide only the light that's needed.
- ✓ Turn lights on/off or dim light levels using motions sensors – no more forgotten rooms.
- ✓ Use data from your Interact Pro dashboard to help you optimize energy usage.

Many Signify and Philips LED products*, including Interact Pro, are DesignLights Consortium qualified in standard and premium categories. According to research, DLC has documented that controls can save up 32% energy savings in an education facility.

Code Compliance

Code Requirements	ASHRAE 90.1	Unique Manufactures	IECC 2018
Lighting Power Density	x	x	x
Dimming	x	x	x
Automatic Shut-off	x	x	x
Daylight Regulation	x	x	x
Time Schedules	x	x	x
Plug Load Controls	x	x	x
Manual Controls	x	x	x
Load Shedding/Demand Response	x	x	x
UL 924	x	x	x

Different code requirements mandate certain control strategies. Whether you're doing a school retrofit project or building a new facility, make sure you are meeting code.

Summary of estimated control factors by building type

Building Type	Total Buildings	Unique Manufactures	Control Factor ¹ (savings percentage)			
			Average	24th – 75th Percentile ²	High-End Trim Contribution	Other Control Strategies ³
Assembly	6	2	0.28	0.11 – 0.45	0.07	0.23
Education	14	5	0.41	0.19 – 0.58	0.19	0.32
Healthcare	2	1	0.52	0.48 – 0.56	0.33	0.24
Manufacturing	73	4	0.40	0.20 – 0.55	0.16	0.29
Office	57	8	0.64	0.53 – 0.81	0.46	0.36
Restaurant	3	2	0.59	0.47 – 0.68	0.27	0.30
Retail	29	1	0.44	0.39 – 0.48	0.22	0.27
Warehouse	10	2	0.68	0.53 – 0.79	0.38	0.48
Overall	194	12	0.49	0.35 – 0.69	0.27	0.32

Did you know that many utility companies offer rebates as an incentive to commercial customers for upgrading to more energy efficient lighting?

Find utility rebates on Signify products at www.usa.lighting.philips.com/support/support/legislation/utility-rebates

* Please see the DLC QPL list for exact catalog numbers, www.designlights.org/QPL

1. A control factor is a number between 0 and 1, representing the fraction of the energy saved through controls. 0 represents no savings, and 1 means all energy is saved. Control factor is equivalent to percent savings (% savings) when presented in percentage. For example, a control factor of 0.49 is equivalent to 49 percent savings (49% savings).

2. The range for the middle 50% is displayed instead of the full range between the minimum and the maximum to provide a more representative range of savings one can generalize and expect.

3. In this report, the control factors for control strategies other than high-end trim, unless otherwise noted, are in comparison to an inferred baseline with savings from high-end trim removed. Therefore, the control factors for highend trim and other control strategies will not add up to the overall control factor. See Page 33 for a more detailed discussion.

Philips Dynalite Wired Options

Both standalone and networked control solutions that meet code requirements, maximize energy savings potential and support flexible functional behaviors, which are ideal for classrooms. With backend software, the system offers the ability to visualize and monitor energy consumption as well as manage lighting assets throughout your school.

Consider a factory pre-configured Room Automation System (PDRAS) with out-of-box scenes and sensor behaviors that are designed to support your learning environments. Save on labor costs with plug and play CAT5 installation between all the control devices and balance your budget with the flexibility to install the PDRAS in a single room application with up to five zones or in a dual room application with up to two zones per room. Moreover, the system is scalable and allows all the spaces to be networked together for central monitoring and management capabilities.

Philips Dynalite Room Automation System

Multizone Control System and flexible all-in-one lighting control solution (PDRAS)

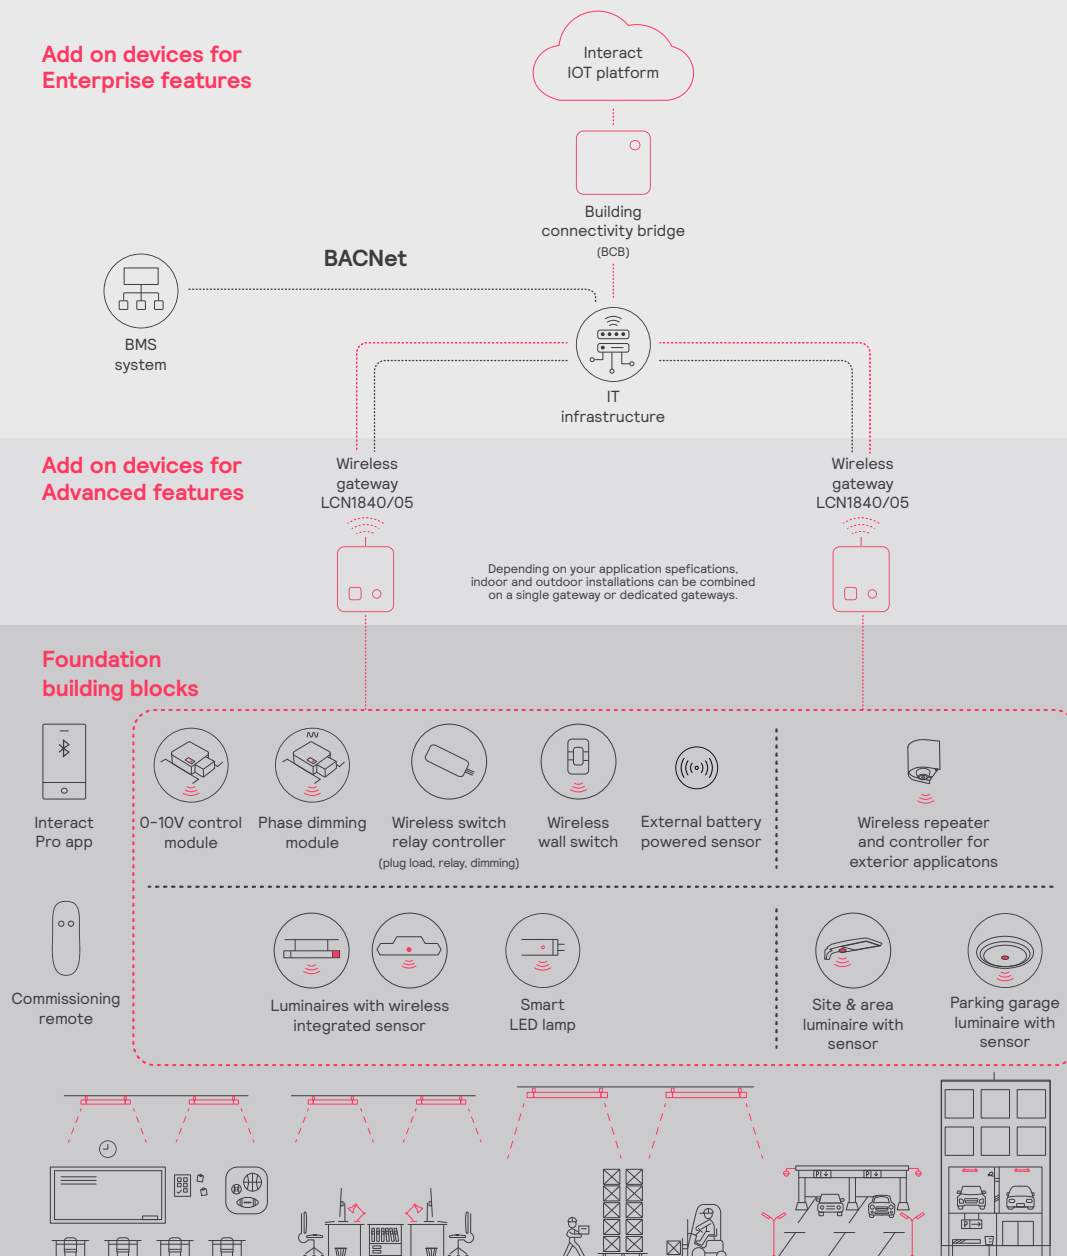

The Philips Dynalite PDRAS brings energy management, occupancy detection, daylight harvesting, and code-compliance for multizone spaces, with simple, intuitive controls and optional ethernet connectivity for plug-and-play installation. The PDRAS uses the latest generation of Dynalite hardware, preprogrammed and configured in our factory to work seamlessly together. Simple plenum installation with pluggable user interfaces and sensors ensures industry-leading performance right out of the box.

interact Wireless Options

Signify Interact Pro helps to boost energy savings, reach sustainability targets, and enhance occupancy comfort levels immediately from day one.

Interact IoT platform is a secure, scalable, and sustainable cloud-based Internet of Things (IoT) platform designed to help run your operations sustainably, efficiently and reliably. The Interact Pro scalable system is a cost-efficient and wireless solution for every step of your smart lighting journey. The system is fully scalable, so it can grow as building requirements grow – from smart to super-smart. This system is fully compliant with all standard regulations to claim utility rebates (ASHRAE, Title 24, IECC, UL924, DLC).
